Easy to release

Releasing is simple, safe, painless & mostly automated

Releasing is risky, painful, lots of manual work, and takes forever.

Suitable process

Our way of working sucks

Our way of working fits us perfectly

Tech quality

Our code is a pile of dung, and technical debt is raging out of control

We're proud of the quality of our code! It is clean, easy to read, and has great test coverage

Value

We deliver great stuff! We're proud of it and our stakeholders are really happy

We deliver crap. We feel ashamed to deliver it. Our stakeholders hate us

Speed

Stories keep getting stuck on dependencies We get stuff done really quickly. No waiting.

We never seem to get done with anything. We keep getting stuck or interrupted.

Mission

We know exactly why we are here, and we are really excited about it.

We have no idea why we are here, there is no high level picture or focus. Our so-called mission is completely unclear and uninspiring.

Fun

We love going to work, and have great fun working together

Booooooooring

Learning

We're learning lots of interesting stuff all the time

We never have time to learn anything
